

Preventing Falls Together

TAKE CHARGE! BY FALLPROOFING YOUR HOME

Look at the FLOORS

IF YOU SEE . . .

Furniture you have to walk around to get through a room

- Ask someone to help you move the furniture to clear a path

Throw rugs or loose carpets

- Remove the rugs (best) OR
- Use double-sided tape so the rugs don't slide and the carpet edges don't curl up

Clutter—like books, magazines, or shoes

- Pick it up and store it on shelves

Electrical or telephone cords where you walk

- Tape the cords to the baseboard so they are out of the way
- Have an electrician install extra outlets so you don't need extension cords
- Switch to cordless phones

Slippery, shiny floors

- Stop using floor polish or wax
- Always wear shoes with non-slip soles
- Wipe up spills immediately

A pet sleeping in your path

- Stay alert and always know where your pet is
- Try to train your pet to sleep in one place

Look at the STAIRS inside and outside

IF YOU SEE . . .

Clutter or other objects—like flowerpots

- Remove them
- Keep stairs clear

Shaky, broken, uneven, or missing steps

- Repair them OR
- Find a handyman, volunteer or family member to repair them and keep them in good shape

Smooth, slippery steps

- Put non-slip treads on each step
- Paint outdoor steps with a mixture of sand and paint for better traction
- Paint the edges of outdoor steps a contrasting colour so they are easier to see

Loose or torn carpet on stairs

- Make sure the carpet is attached on every step OR
- Remove the carpet and use non-slip treads on each step

Stairs with no handrails or with shaky or broken handrails

- Fix the handrails or have new ones installed
- Be sure there are handrails on both sides of the stairs and that they go all the way from the top to the bottom of the stairs

Preventing Falls Together

TAKE CHARGE! BY FALLPROOFING YOUR HOME

Look at the **LIGHTING** in your home.

IF YOU SEE . . .

Dimly lit halls and rooms

- Use brighter bulbs—100 watts
- Use light fixtures with more than one bulb so if one bulb burns out, you will still be able to see until it gets replaced
- Use night lights in hallways

No lights or dim lighting on stairs

- Have an electrician install lights and light switches at the top and bottom of the stairs

No light switch within reach when you stand in the doorway of each room

- Have an electrician install a light switch near the entry to each room

Look at your **KITCHEN**.

IF YOU SEE . . .

Items you often use stored on hard-to-reach shelves

- Move pots, pans and other items you use often to waist-high, easy-to-reach places
- Store heavy items in lower cupboards

A chair or an unsteady step stool used for reaching high places

- Get a sturdy step stool with a safety rail to hold on to
- Never use a chair for climbing

Look at your **BATHROOM**.

IF YOU SEE . . .

A slippery floor in tub or shower

- Use a non-slip rubber bath mat or put non-slip strips on the tub or shower floor

Nothing sturdy to hold onto when getting out of the tub or off the toilet

- Have a handyman or carpenter install grab bars around the tub, shower, and toilet
- If you have trouble getting up from the toilet, install a raised toilet seat
- If you ever feel dizzy or tired while bathing, put a bath seat in the tub or shower

Look at your **BEDROOM**

IF YOU SEE . . .

No clear path between the bed and the bathroom

- Clear a path. Get help if you need to move furniture.
- Make sure the path is free of clutter
- Install automatic night lights along the way so you can find your way in the dark

No light or phone within reach of the bed

- Install a lamp or light switch that you can reach without getting out of bed
- Keep a phone within reach
- Keep a flashlight by your bed
